Index

Vol. 1, No. 1-4 (Mar, Jun, Sep, Dec 1976)

Title Index

A Method of Testing the Content of Nonmetallic Impurities in Zinc Alloy Castings — *F. Romankiewicz* — Poland (Dec, p 13)

Applications of the Plasma Furnace on the Production of Iron and Highly Pure Ferrous Alloys and their "Doping" with Certain Nonmetallic Elements — *J.-C. Durand, B. Rondot, J. Montuelle* — France (Jun, p 11)

Compacted Graphite Cast Irons and their Production by a Single Alloy Addition — *E. R. Evans, J. V. Dawson, M. J. Lalich* — US & UK (Jun, p 13)

Conditions Necessary for Nodular Crystallization of Graphite in Cast Iron — *G. T. Van Rooyen* — Republic of South Africa (Sep, p 53)

Contribution to the Mechanism of Formation of Chunky Graphite — *P. Strizik, F. Jeglitsch* — Austria (Sep, p 23)

Controlled Additions of Hydrocarbon Components to Molding Sand Mixtures Improve Casting Surface Finish — *I. Bindernagel, A. Kolorz, K. Orths* — W. Germany (Dec, p 42)

Direct Observation of the Flow of Molten Steel in Sand Molds — *M. C. Ashton, R. K. Buhr* — UK, Canada (Dec, p 28)

Direct Reduction; Up, Up and Away — *J. R. Miller* — United States (Jun, p 51)

Graphite Growth in Cast Iron — *R. H. McSwain, C. E. Bates* — United States (Mar, p 53)

Heavy Section Castings in Ductile Iron — *H. Mayer* — Switzerland (Dec, p 21)

Hot Rolling and Forging of Ductile Iron — *L. A. Neumeier, B. A. Betts, R. L. Crosby* — United States (Mar, p 17)

Inoculation and Spheroidizing Treatments Directly Inside the Mold — *M. Remondino, F. Pilastro, E. Natale, P. Costa, G. Peretti* — Italy (Mar, p 39)

Mathematical Principles of Sand Reclamation (Part 2) — *K. Srinagesh* — United States (Dec, p 18)

On the Special Super-High Early-Strength Cement Sand Process (OJ Process) — *H. Uchikawa, S. Uchida* — Japan (Sep, p 31)

Rheocasting Processes — *M. C. Flemings, R. G. Riek, K. P. Young* — United States (Sep, p 11)

Scanning Electron Microscope Examination of Stress Corrosion Cracking Patterns of Austenitic Stainless Steels Cast Centrifugally — F. Karim — Pakistan (Jun, p 31)

Soviet Research Work on the Liquid State of Cast Iron — *A. A. Zhukov, R. L. Snezhnoy, N. G. Girshovitch* — USSR (Mar, p 11)

Structure and Properties of Al-Mn and Al-Mn-Si Cast Alloys — *J. Campbell, P. S. Nyholm, B. R. Knott* — United Kingdom (Dec, p 9)

Structure of 15% Chromium Cast Irons Alloyed with up to 5% Vanadium, a Dilatometric and Difractometric Study — *D. M. Stefanescu, D. Mitea, S. Craciun* — Rumania (Jun, p 19)

Technology Forecasting for the Foundry Industry of India — *B. J. Vyas, B. Bowonder, P. K. Rohatgi* — India (Mar, p 35)

Temperature Field in the Mold During Casting and Solidification of Steel (Part 1) — *J. Jamar* — Belgium (Mar, p 29)

Temperature Field in the Mold During Casting and Solidification of Steel (Part 2) — *J. Jamar* — Belgium (Jun, p 37)

Temperature Field in the Mold During Casting and Solidification of Steel (Part 3) — *J. Jamar* — Belgium (Sep, p 38)

Testing Methods and Casting Defects Caused by Molding Materials — *G. Steinbauer* — W. Germany (Mar, p 8)

Thermal Studies on Hypereutectic Cast Iron Solidifying in Metallic Molds — *K. Ramesh, M. N. Srinivasan, M. R. Seshadri* — India (Sep, p 47)

Use of Sponge Iron in Foundries — *W. Pietsch* — United States (Jun, p 43)

Author Index

Ashton, M. C.; Buhr, R. K. — *Direct Observation of the Flow of Molten Steel in Sand Molds* (Dec, p 28)

Bates, C. E.; McSwain, R. H. — *Graphite Growth in Cast Iron* (Mar, p 53)

Betts, B. A.; Neumeier, L. A.; Crosby, R. L. — *Hot Rolling and Forging of Ductile Iron* (Mar, p 17)

Bindernagel, I.; Kolorz, A.; Orths, K. — *Controlled Additions of Hydrocarbon Components to Molding Sand Mixtures Improve Casting Surface Finish* (Dec, p 42)

Bowonder, B.; Vyas, B. J.; Rohatgi, P. K. — *Technology Forecasting for the Foundry Industry of India* (Mar, p 35)

Buhr, R. K.; Ashton, M. C. — *Direct Observation of the Flow of Molten Steel in Sand Molds* (Dec, p 28)

Campbell, J.; Nyholm, P. S.; Knott, B. R. — *Structure and Properties of Al-Mn and Al-Mn-Si Cast Alloys* (Dec, p 9)

Costa, P.; Remondino, M.; Pilastro, F.; Natale, E.; Peretti, G. — *Inoculation and Spheroidizing Treatments Directly Inside the Mold* (Mar, p 39)

Craciun, S.; Stefanescu, D. M.; Mitea, D. — *Structure of 15% Chromium Cast Irons Alloyed with up to 5% Manganese or 5% Vanadium, a Dilatometric and Difractometric Study* (Jun, p 19)

Crosby, R. L.; Neumeier, L. A.; Betts, B. A. — *Hot Rolling and Forging of Ductile Iron* (Mar, p 17)

Dawson, J. V.; Evans, E. R.; Lalich, M. J. — *Compacted Graphite Cast Irons and Their Production by a Single Alloy Addition* (Jun, p 13)

Durand, J.-C.; Rondot, B.; Montuelle, J. — *Applications of the Plasma Furnace on the Production of Iron and Highly Pure Ferrous Alloys and their "Doping" with Certain Nonmetallic Elements* (Jun, p 11)

Evans, E. R.; Dawson, J. V.; Lalich, M. J. — *Compacted Graphite Cast Irons and Their Production by a Single Alloy Addition* (Jun, p 13)

Flemings, M. C.; Riek, R. G.; Young, K. P. — *Rheocasting Processes* (Sep, p 11)

Girshovitch, N. G.; Zhukov, A. A.; Snezhnoy, R. L. — *Soviet Research Work on the Liquid State of Cast Iron* (Mar, p 11)

Jamar, J. — *Temperature Field in the Mold During Casting and Solidification of Steel — Part 1* (Mar, p 29)

Jamar, J. — *Temperature Field in the Mold During Casting and Solidification of Steel — Part 2* (Jun, p 37)

Jamar, J. — *Temperature Field in the Mold During Casting and Solidification of Steel — Part 3* (Sep, p 38)

Jeglitsch, F.; Strizik, P. — *Contribution to the Mechanism of Formation of Chunky Graphite* (Sep, p 23)

Karim, F. — *Scanning Electron Microscope Examination of Stress Corrosion Cracking Patterns of Austenitic Stainless Steels Cast Centrifugally* (Jun, p 31)

Knott, B. R.; Campbell, J.; Nyholm, P.S. — *Structure and Properties of Al-Mn and Al-Mn-Si Cast Alloys* (Dec, p 9)

Kolorz, A.; Bindernagel, I.; Orths, K. — *Controlled Additions of Hydrocarbon Components to Molding Sand Mixtures Improve Casting Surface Finish* (Dec, p 42)

Lalich, M. J.; Evans, E. R.; Dawson, J. V. — *Compacted Graphite Cast Irons and Their Production by a Single Alloy Addition* (Jun, p 13)

Mayer, H. — *Heavy Section Castings in Ductile Iron* (Dec, p 21)

McSwain, R. H.; Bates, C. E. — *Graphite Growth in Cast Iron* (Mar, p 53)

Miller, J. R. — *Direct Reduction: Up, Up and Away* (Jun, p 51)

Mitea, D.; Stefanescu, D. M.; Craciun, S. — *Structure of 15% Chromium Cast Irons Alloyed with up to 5% Manganese or 5% Vanadium, a Dilatometric and Difractometric Study* (Jun, p 19)

Montuelle, J.; Durand, J.-C.; Rondot, B. — *Applications of the Plasma Furnace on the Production of Iron and Highly Pure Ferrous Alloys and their "Doping" with Certain Non-metallic Elements* (Jun, p 11)

Natale, E.; Remondino, M.; Pilastro, F.; Costa, P.; Peretti, G. — *Inoculation and Spheroidizing Treatments Directly Inside the Mold* (Mar, p 39)

Neumeier, L. A.; Betts, B. A.; Crosby, R. L. — *Hot Rolling and Forging of Ductile Iron* (Mar, p 17)

Nyholm, P. S.; Campbell, J.; Knott, B. R. — *Structure and Properties of Al-Mn and Al-Mn-Si Cast Alloys* (Dec, p 9)

Orths, K.; Bindernagel, I.; Kolorz, A. — *Controlled Additions of Hydrocarbon Components to Molding Sand Mixtures Improve Casting Surface Finish* (Dec, p 42)

Peretti, G.; Remondino, M.; Pilastro, F.; Natale, E.; Costa, P. — *Inoculation and Spheroidizing Treatments Directly Inside the Mold* (Mar, p 39)

Pietsch, W. — *Use of Sponge Iron in Foundries* (Jun, p 43)

Pilastro, F.; Remondino, M.; Natale, E.; Costa, P.; Peretti, G. — *Inoculation and Spheroidizing Treatments Directly Inside the Mold* (Mar, p 39)

Ramesh, K.; Srinivasan, M. N.; Seshadri, M. R. — *Thermal Studies on Hypereutectic Cast Iron Solidifying in Metallic Molds* (Sep, p 47)

Remondino, M.; Pilastro, F.; Natale, E.; Costa, P.; Peretti, G. — *Inoculation and Spheroidizing Treatments Directly Inside the Mold* (Mar, p 39)

Riek, R. G.; Flemings, M. C.; Young, K. P. — *Rheocasting Processes* (Sep, p 11)
